Dear Mimi:

Buying a unit at LeRivage is half the battle; finding the right designer to do the job right and on time is another story. After various considerations with other designers in town, your firm, was introduced to us by one of your clients from Club LeCeil.

Mimi, you were able to show us the essence of imaginative and creative interior design. Being exposed to the European and Mediterranean and rich cultures at an early age, you are a step ahead of any designer we talked to. You are more about creating a residential serenity. The true collaboration of professionalism and creativity.

Mimi, you incorporated the essence of Florida living with the old world charm and comfort of the Mediterranean Neo Classic Style. With a spacious home of 6,800 square feet, and a spectacular water view, our main concern was having the kind of interior that goes with the standard of the building which would meet our needs and expectations.

With your staff handling the various trades needed and taking care of the business affairs, they were able to execute the project in a smooth and professional manner.

The project started out with three dimensional drawings, architectural detailing, and furniture layouts, which made it easy for us to know and understand every step of the project visually.

With the cooperation of your team, all together, or on a one-to-one basis, this project for us has ended up to be a delightful experience.

Sincerely,
